DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a combination of a blood/fluid dispenser and a material of the membrane contained within the dispenser, classified in class 604, subclass 403.
- II. Claims 9-19, drawn to subcombination of the material, classified in class 514, subclass 772.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 1 does not set forth the details of the sub-combination, materials, to the same extent set forth in claim 9. The subcombination has separate utility such as a membrane in devices other than a dispenser as claimed.
